OVERVIEW

Airborn is a thrill ride for teenagers and adults. The platform spins about its own axis while the arms are raised and lowered by pneumatic cylinders, combining rotation with sudden vertical movement.

A full LED lighting package makes the ride a visual anchor after dark. Ride programme, colours and lighting are specified per project.

Designed and manufactured with reference to international amusement-ride standards, EN 13814 in particular. Certification and approval are planned per project for the country of installation.
