OVERVIEW

The 8 m carousel is the mid-size model of the range and the most common choice for family parks and entertainment centres.

A two-row gallop with lit canopy and themed figures, it fits a compact footprint while keeping the classic silhouette. Figures, colours and lighting are matched to the site.

Designed and manufactured with reference to international amusement-ride standards, EN 13814 in particular. Certification and approval are planned per project for the country of installation.
