Values are for the standard configuration and may vary with options and site conditions. Detailed layout drawings, foundation loads and electrical requirements are provided with the quotation.

## OVERVIEW

The Family Coaster is designed entirely in-house — a train that draws both young guests and their families into the park.

Gravity and the momentum of the train provide the excitement; two track sizes let it fit parks with different space and capacity needs. Train theming and colours are specified per project.

Designed and manufactured with reference to international amusement-ride standards, EN 13814 in particular. Certification and approval are planned per project for the country of installation.
